## WORK EXPERIENCE

---

**Web Developer / Freelance**

**Jan 2023 - Present**

- Troubleshoot integrations and user-interface design errors on Wordpress and Shopify websites
- Convert Figma and Adobe designs to pixel-perfect websites using HTML, CSS, JavaScript
- Document changes and strategies applied for non-technical clients' future reference

**Frontend Engineer / Alpaca Markets**

**Mar - Nov 2022**

- Built and maintained client facing and internal dashboards in a fast paced fintech startup environment
- Launched a new feature, [Alpaca Connect](#), as the lead developer working with a PM and UX Designer
- Refactored React class components to TypeScript components with hooks to improve maintainability
- Code reviewed PRs and deployed to staging, sandbox and production environments
- Supported web analytics team with data collection by adding Amplitude event tracking

**Digital Marketer / Communitech**

**Sept 2020 - Dec 2020**

- Led a multi-disciplinary team to build digital marketing strategies over 4-6 week cycles with clients
- Explained complex concepts to clients and sectioned robust strategies into smaller actionable steps
- Completed style edits and added SEO to Shopify websites and Google My Business profile

**Social Media Specialist / Banff and Lake Louise Tourism**

**May 2018 - Dec 2019**

- Engaged with community of 500k fans and 1M reach in the brand voice on FB, IG, Twitter, Live Chat
- Acted as the first point of contact when professionally replying to negative comments online
- Led and documented notes for a weekly cross-functional meeting to unify strategies

## PROJECTS

---

**Wealthify / React, Axios, SASS, Chart.js, Ruby, Rails API, Active Record, PSQL**

[Github](#)

- SPA for users to paper trade stocks/crypto using live financial API data and track their portfolio
- Backend built with Rails to create REST APIs and JWT for authorization
- Coded thoughtful UI for entire project using SASS and Chart.js for data visualization
- Presented live demo on Hopin video conferencing tool to a crowd of 200+ attendees

**Scheduler / React, JSX, Axios, Node, Express**

[Github](#)

- Full-stack SPA allowed users to book, modify, or cancel an interview based on availability
- Created functional components populated with JSON data fetched via Axios
- Focused on unit, integration and end-to-end testing with Jest, Storybook and Cypress

**TinyApp / Node, Express, EJS, HTTP, Cookies**

[Github](#)

- Multi-page app where authenticated users created shortened URLs to share with everyone
- Programmed an HTTP server that handled get, post, put, and delete requests from the browser/client
- Implemented cookie sessions to track user login status and grant or deny permissions accordingly

## EDUCATION

---

**Lighthouse Labs:** Full-stack, JavaScript, React, jQuery, AJAX, SASS, Node, Express, PSQL, Ruby, Rails

**Harvard CS50:** Memory, data, systems in C, Python, SQL

**McMaster University:** HBS Life Sciences, exchange semester in France
